

## City of McCall

### Notice of Intent to Temporarily Shut Water Off

This letter is to inform you that your residence or place of business will be affected by an upcoming temporary water system shutdown. This shutdown is part of the planned City of McCall Downtown Reconstruction Project upgrades and will take place sometime between 3/12/19 and 3/22/19. While the exact date and time of the shutdown is not known at this time, we wanted to extend the courtesy to you to allow enough time to make necessary preparations. **Kyle Hickman with Crestline Engineers (208) 760-7316** will be the primary contact for this work should you have any questions and will follow-up in a subsequent attempt to notify all affected properties of the exact date and time when it is known.

**\*\*\*It is important to note that unless you have physically received a copy of this intent, that you will not be affected. This notice will only affect select businesses on North 1<sup>st</sup> Street and Lake Street. Please do not copy or otherwise distribute this notice.**

#### What to Expect:

- Planned shutdowns of this nature will usually last 6-8 hours and will be during the business hours Mon-Fri.
- During this time no water will be available for use to your property. (Bathrooms, toilets, sinks, kitchens, etc.)
- After the water is turned back on, laws that govern the U.S. drinking water systems will require testing to make sure that no contamination has entered the system. While actual contamination of the system is unlikely, this will result in a 3-5-day boil advisory, during which time the water will be able to be used for flushing of toilets, showering, etc., but is recommended that the water is boiled before being used for dishwashing (without heated drying), food preparation, or human consumption.
- Please make preparations now for the shutdown period and subsequent boil advisory period to provide any necessary drinking water, food preparation, handwashing facilities, etc. that you may need to minimize the impact that this may have on you or your patrons.

**WE APPOLIGIZE FOR ANY INCONVIENIENCE THIS MAY CAUSE YOU!**

If you have additional questions, please feel free to contact **Crestline Engineers at 208-634-4140** or the Public Works Department at 208-634-5580.

This notice is being sent to you by Crestline Engineers
