

**NOTICE: Water Meter install required prior to
Footing Inspection
(when connecting to City water)**

Effective May 1, 2020

Prior to scheduling a Footing Inspection or pouring any concrete – the Water Meter must be installed and approved by the Public Works department.

**Builders/Property Owners will purchase their Water
Meter from the City of McCall as part of the Building
Permit Process**

- Please contact the Public Works department for more detail on the procedures. 208-634-5800
- Public Works will provide proof of installation to the Building Department within 24 hours of the water meter install.
- A footing inspection may be scheduled for the day after water meter installation.

*Billing for water service will commence when water meter is installed.

See rate sheet below.
